## Profile

since I was a child I was always curious about how websites are crafted and the magic behind making them interactive. As a result, I've had a keen interest in Frontend development work and since I've started playing around with JavaScript, CSS. I've become even more excited about the idea of a Frontend developer role.

## Professional Experience

January 2024 – present

Saudi Arabia

### riadiat, frontend developer

As a Frontend Developer at Riadiat, I played a pivotal role in the ongoing development of our freelance platform, similar to Upwork. My primary responsibilities encompassed collaborating on the design and implementation of the user interface, ensuring seamless user experiences, and optimizing the platform's performance.

One of the significant projects I contributed to involved integrating a secure payment gateway, enhancing the platform's functionality and enabling seamless financial transactions between freelancers and clients.

May 2024 – June 2024

Saudi Arabia

### VIVID Events, frontend developer

Developed a dynamic, multi-step booking form website to streamline the customer booking process. The website allows customers to select one or multiple dates for their bookings and choose specific start and end hours for each selected date. Additionally, customers can select desired services for each chosen date. The form seamlessly integrates with the backend to handle form submissions, ensuring data is securely processed and stored. Upon submission, the website provides functionality for users to download invoices or share them directly via WhatsApp.

December 2023 –

January 2024

France

### HYPER10N TECHNOLOGIES, Frontend developer

I developed a fully responsive website for a Google Chrome extension using React.js and Tailwind CSS. This project involved creating a user-friendly interface that adapts seamlessly to various screen sizes and devices, ensuring a consistent experience for users across different platforms.

## Skills
